Shocking Railway Disaster in Chicago.

An Engineer's Carelessness Cause the Death of Five Persons.

George Francis Train in a Boston Bastille for Debt.

The Case of Rallway-wrecker Iver Goes to the Jury, and They Take Time to Deliberate

By Telegraph to The Times.
CHICAGO, Sept. 24.—[By the Associated Press.] Five innocent lives paid the penalty of the wanton carelessness of a Press.) Five innocent lives paid the penalty of the wanton carelessness of a railroad engineer at the corner of Vincennes avenue and Eighty-seventh street, in this city, this evening. The suburban train on the Rock Island road, leaving the Chicago depot at 6:18, leaves every evening at this point the Washington Heights coach to be caught up by a dummy. This evening the car was left as usual, when a moment later, the passengers were horrified to see bearing down upon them, at the rate of twelve miles an hour, a heavy freight train of the same road. There was no time MIT MAY CONof the same road. There was no time for flight. The engineer reversed his engine, but with almost undiminished speed it plowed into the passenger coach until the locomotive was hidden entirely in the wreck. Wild shrieks and groans an-

the wreck. Wild shrieks and groans announced the horror of the disaster, and as the steam formed in a thick cloud around the scene the terrified speciators realized that the ill-fated passengers were being roasted alive. Willing hands lent all assistance possible, but the engineer having failed to shut off the steam the steam chest was blown out by the shock of the collision, and the death-dealing vapor hissed forth ceaselessly for nearly an hour. Strange to say not a person was killed by the collision, the loss of life being sole attributable to the scalding steam that enveloped the coach. The dead as taken out were found to be literally roasted. Fiesh dropped from their hands and limbs, and their gairing syes told the horror of the experience. glaring eyes told the horror of the experience.

When a thorough search had been completed, it was found that three ladles and two gentlemen had lost their lives, and a third man was in a dying condition. Six other persons were seriously injured. The latter six unfortunates were hurriedly conveyed to their homes, near at hand, while the dying man was taken to the institute of the Bisters of Mercy. The five dead were conveyed to the morgue.

The list of. Killed is: Mrs. Kelly, J. J. McKinzie, Fred Huebner, Mrs. Brown, an unknown woman, all of Washington Heights.

JUSTICE PIELD.

He Says He is Not Now Under Neagle's Protection.
CHICAGO, Sept. 24.—[By the Associated Press.] Justice Field of the United States Supreme Court artived here this morning en route from San Francisco to Washington. He went at once to the Palmer House. It was supposed that United States Deputy Marshal Neagle was with him, but he was not seen to get off the train.

When asked about the Terry killing, Justice Field said: "I think the tragely will result beneficially. There will be laws passed by Congress, and also by State Legislatures, for the protection of judges from the wrath of disappointed and desperate litigants. It is necessary in order to keep justice pure that a judge on the bench should not be compelled to let fears of litigants' revenge change the course of his rulings." He Says He is Not Now Under

gants' revenge change the course of his ruling."

"Do you expect any attempts of revenge to be made by Mrs. Terry?"

"One cannot tell. She is closely watched, but desperate people take desperate chances sometimes."

"Is Marshal Nesgle traveling with you?"

"No; I nave had no protection since leaving Tacoma."

It was ascertained, however, that Marshal Nesgle traveled on the same train with Justice Field, but Justice Field said Nesgle was not of his party. "Marshal Nesgle directs his own affairs," said Justice Field, when questioned on this poluj. "I have nothing to do with his actions. He goes and comes as he chooses. I have no body-guard, I assure you."

Justice Field and party left the city for the East this afternoon.

KING OF THE TURF. KINGSTON WINS ANOTHER BIG

Struggle in Vain Against Dwyer's Great Horse-The Record Broken.

By Telegraph to The Time.

GRAVESEND, Sept. 24.—[By the Associated Press.] Fully 12,000 people were present today. The event of the day was the first special race, in which the king of the turf, Kingston, cleverly ridden by Murphy, passed under the wire a length in front of Raceland, Banker August Belmont's representative.

front of Raceland, Banker August Belmont's representative.

The pace was very slow in the first quarter, and passing the stand after having traversed a quarter of a mile Raceland led by four lengths. At the end of the three-quarters Raceland was two lengths in the van. Kingston and Los Angeles were lapped, with Tenny three parts of a length behind.

Making the turn for home Los 'Angeles was beaten, and Barnes began to apply his wills. Hamilton and McLaughlin also went to the whip, but Murphy merely shock Kingston up. The great racer gamely responded, and coming with a rush was soond, in the van. Raceland was then second,

asked him to guarantee it. Spiller, Train says, is a pawnbroker, and he advanced some of the money. In 1876 Spiller got judgment against Train in Toledo for \$100, and four years later wanted to settle, so Train says, for \$50. Train says Sant told him he paid it all. Spiller then got judgment for \$363, and now, after 13 years, comes with the amount swollen to \$1000. When asked if he intended to pay it, Train said: "Of course I'll go to jail."
Train was arraigned in the Municipal Court this afternoon. He presented his own case, making a very humorous address. As he refused to take the poor debtor's oath or furnish bonds, he was committed to the County Jail. He accepted his fate philosophically.

The second night of the fair in Haz-ard's Pavilion was more of a success than the management had anticipated, for the attendance on the opening night was rather light, and it was feared that the people would not turn out to see the finest exhibit ever made in the southern country. Last night there must have been over 2000 people in attendance, and they all seemed to be highly pleased with the display. All of the entries have been placed,

deserve considerable credit for their courage in going to such an outlay, when it is remembered that times are dull and money is scarcer than it has been for a long time past. It is the duty of citizens to see that they do not have to go down in their individual pockets to make up a delinquency after the fair classes. LAST EVENING the visitors began to come in early, and by 8:30 the big hall was comfortably filled, and a number of ladies and gentlemen were seated in the gallery. The Seventh Regiment Band furnished the music, and carried out the following programme:

The visitor turns to the left and soon finds himself mounting the broad stairs to the gallery, which extends around the entire building. Every particle of available space on this floor is occupied by competing exhibitors.

The first thing that attracts the eye at the head of the gallery stairs on the left is the Los Angeles Gas Company's exhibit. The display is quite elaborate and attracts considerable attention.

Next comes the Lowe Gas Company's display. This company has secured three stalls, and they have put some of their best men in charge. MANUFACTURES. Condensed Milk and Cheese Fac

A Condensed Milk and Cheese Factory Projected.

It has been generally understood for some time past that Southern California, and Los Angeles expecially, could never amount to much from a business standpoint so long as manufacturing industries are neglected. This is true to a certain extent, but people should remember that factories do not make a big population, but, on the other hand, a big population causes factories of all kinds to spring up. Whenever a great number of people up. Whenever a great number of people come together in one spot of limited acreage, factories spring up on all sides, and the first thing one knows, the whole city is full of energy and

the whole city is full of energy and push.

During the past five years Los Angeles has more than doubled in population, and during the next few years she will develop factories enough to keep several thousand people in business all the time.

Even now one would be surprised to know that over \$200,000 a month goes into the manufacturing business in this city. A trip through the eastern and northeastern portion of the city will soon convince any one that Los Angeles is very active in this respect. A few years ago \$5000 a month would have kept the whole southern country's factory interests spinning. But people are coming here rapidly, and the time will soon come when it will take \$5,000,000 a month to keep the institutions in running order. This has been the history of all cities, and there is no reason why Los Angeles should not go in the same way. In fact, everything points that way now. Capitalists fram all parts of the world have their eyes on Los Angeles and many of them have already invested here.

The latest manufacturing industry

many of them have already invested here.

The latest manufacturing industry to be gone into in this section has just been made public, although the projectors have been at work for some time past. A big condensed milk and cheese factory will be established near Los Angeles sometime during the coming year. The factory will be one of the largest in the world and will employ several thousand people.

Joseph Plitado, A. Young and several other eastern capitalists are at the back of the project. Messrs. Plitado and Young have had long experience in this business and they are confident that they will soon be able to turn out several carloads of their products a month.

The plant and land will cost shout.

month.

The plant and land will cost about \$500,000, and will be one of the finest institutions in the State. Messrs. Plitado and Young are now here and are hard at work.

GENERAL IMPROVEMENT OF FREIGHT BUSINESS.

Freight business is improving all the time, and is better on the Southern Pacific lines than it has ever before been at this season of the year. This is almost a daily occurrence, and the railroad people say that the indications ro

The big hotel is being cleaned up and will be opened very soon. Cold weather is setting in earlier than usual in the East, and all indications go to show that this winter will be the severest felt for some time. The Knights Templar will leave for the conclave at Washington, D. C., on Saturday next, and the railroad people are making numerous preparations for their departure.

Suit to Recover the Amount of a Policy.

A complaint will be filed today A complaint will be filed today against the California Accident Indemnity Company by the brother of Frank Holdner, deceased, to recover judgment against the company for \$1500, the amount of an accident policy on the life of the deceased. The company, singularly enough, refuses to pay the policy on somewhat shadowy grounds.

the possession of the defendants for 25 years. The property embraces 90 feet on Main street and 200 feet on Pirst street. Away back in the early days it was used as a corral, where horses were put up. It is now valued at \$250,000 or \$300,000.

The Nordholts and other defendants belong to that old Alvarado family, which was one of the prominent Spanish families in the early history of the State. They claim their title to the property through the widow of the property through the widow of the projeinal owner, Xavier Alvarado, and from two of his heirs; also from tax title.

The plaintiff, Tomas Alvarado, claims an interest of an eleven-twenty-second part in the land and property, not an entire interest, and his claim is through conveyances from some of the original heirs. He prays for a judgment to put him in possession of his interest.

As may be imagined from the variety After his death, his brother, to whom the accident policy was made payable, sent in the cisim to the company. They at first promised to pay if September 10th, but later on refused to do so, and have continued to do so up to the present time, although the premiums were fully paid up. They base their refusal to liquidate the claim on the ground that the deceased told them when taking out the policy that he was an express driver, whereas he was a driver for the brewing company; also that he stated that he was a man of temperate habits, when he pany; also that he stated that he was not, although they do not clathat he was under the influence of toxicants during his fatal drive. Ut these grounds, the complaint wallege, the accident company refut to pay the policy, and will required the same of the s ent for the amount.

F. M. Garrett was brought out for arraignment before Judge Cheney yesterday morning upon one of the charges of incest, under which he was held by the lower court. He pleaded not gullty, and his trial was set for November 19th. He tried to have it set still further away, on the ground that he wished more time to secure evidence from New Orleans, but the Court refused to set it further away than November. The other case against him was transferred to Department No. 6. This charges him with a similar offense, rape of his daughter, committed on another date from that alleged in the first information. The defendant then went back to jail to await his trial.

The Griffith case, in which the defendant is charged with an infamous crime, was continued until Saturday, owing to a misunderstanding between attorneys as to who is employed in the case.

He said unless something was done immediately the church would be sold. Bishop Foster made a very earnest appeal. At 5 o'clock yesterday evening a young woman with a baby in her arms, and a 8-year-old girl toddling at her side, walked into the police station and told a sad story of want. Her name is Mrs. Helena Hart, and in April last she and her sister left Missouri, their native State, to seek em ployment in California. Her husband a ranch hand, was too poor to accom-pany her, but he hoped to be able to pany her, but he hoped to be able to join her in a few months. She and her sister found work in Santa Paula, where her sister is still in service, but as the family for whom she worked left the town, Mrs. Hart came to Los Angeles. Here she supported herself and children by taking in washing, but, finding work scarce, she tried to get into service with some family. Her children, however, were an obstacle to this, and she endeavored to find some place to put them. The orphan asylum would not receive them, as their parents were living, and for 36 hours she and they had been without lodging or food. Officer Wright of the Humane Society was unfortunately away, but will be back today and will doubtless make some arrangement for them. Officers Rowan and Pond took up a collection to relieve their present necessities, and the sum of \$3.50 was contributed by the sympathizing lawyers, officers and reporters. raging in the fields in that section all day yesterday.

The passengers on the San Diego irain who came in yesterday say the fire was raging on both sides of the track, and they thought they would be smothered before they got through the burning district. The fire was still raging last night, and the chances are that hot days will be in order the rest of this week. It is impossible to estimate the damage done at this time.

SUPERVISORS IN DANGER.

The Board of Supervisors, who were out inspecting roads, bridges and beer yesterday, met with rather a singular accident in the Santa Ana Valley. They were driving quietly along in a large six-seated carriage, when all of a sudden a regular old he Santa Ana struck them amidships, and quicker than a flash their carriage was converted into a bicycle. The wheels that first came in contact with the storm were raised three feet from the ground, and the wheels on the other side had to bear the weight of the law-makers. The heavy-weights of the law-makers. The heavy-weights of the law-makers. The heavy-weights of the board climbed up on the windward side of the carriage, and finally succeeded in bringing it down, but they had a narrow escape from being capsized, and their presence of mind is the only thing that saved them. The zandstorm seemed to be going at the rate of 50 miles a minute, and the sand was so thick that the board had to turn back. It is said to have been the heaviest sandstorm that has struck the valley for some years. The wind was so bot that people who passed through it had to cover their faces up with blankets and laprobes to keep it from burning their whiskers off. The Supervisors spent the whoie afternoon explaining how they escaped with their lives.

So far as can be learned there was no damage done to any of the ranchhouses in the line of the storm. It subsided late in the afternoon. SUPERVISORS IN DANGER.

A TRIVIAL OFFENSE,

For Which A Veteran Is Suffer Ing.
There is an old soldier in the County Jail who thinks he is being most frightfully abused. The other day he visited Santa Monica, and, as he wished to Santa Monica, and, as he wished to carry some baggage to the home, he borrowed a valise. He promised to return it at a certain time, but for some reason he failed to show up on the day set, and the owner of the valise swore out a complaint and had him arrested. He was taken before a justice of the peace, and held to appear before the Superior Court. The old fellow is now in the County Jail, and the chances are that he will remain there several months unless some one takes an in terest in him and gets him out.

A SEWER COMMISSION.

As announced yesterday in The Times, an authorized body of citizens has, by request of the Council, appointed a citizens' commission to act with the Sewer Committee of the Council. The commission is composed as follows: First Ward, John E. Jackson; Second Ward ond Ward, A. H. Judson; Third Ward, C. M. Wells; Fourth Ward, A. H. Denker; Fifth Ward, George Han sen; Sixth Ward, Stephen M. White; Seventh Ward, B. Cohn; Eighth Ward, Workman; at large, Dr. J. P. Widney, L. N. Breed, E. M. Hamilton, John R. Toberman, Dr. H. Sinsabaugh, William

Ferguson and Dr. Wills. These are good men and should be able to do effective work. The Council able to do effective work. The council
now having gracefully yielded to the
wishes of the people in the matter of a
commission, and solid, sensible citizens
having been selected as members of that commission, there is no reason why any tension which may previously have existed between the Council and the opponents of the sewer bonds should not disappear and be forgotten, and a determined effort made by the combined forces to arrive at a solution of this much-vexed but not insoluble problem. We look for practical re-

ults from such action.

The commission will undoubtedly, among its other investigations, thoroughly examine into the question of treating the sewage at or near the city limits by the city itself in some simple and inexpensive manner. The opin-ion that some such plan is very desirable grows from day to day, and is

well founded. While on this subject, we desire to call the attention of the commission to the recent law authorizing Supervisors to establish sanitary districts. It would be well for the commission to in-quire whether this law does not facilitate cooperation between the city and county. If so, matters would be much county. If simplified.

The outlook for a speedy settlement of the sewer question is better now than it has been for a long time, whereat all good citizens should re-

THE PENSION OFFICE

A dispatch announces that Maj. Warner has declined the Pension Com-missionership, and all sorts of rumors are in circulation. This trouble in filling the vacancy in the Pension Of-fice has brought out the suggestion that it should be transferred to the War Department, and an army officer of high rank detailed to serve as Commissioner. Pensions seem to belong logically to the War Department. The hospital and other records are there. Much of the clerical and other labor necessary in obtaining evidence in penion cases is performed at the War Department, and a transfer would not only asve money, but remove much of the delay now experienced by appli-cants through the red tape that is al-

The soil or the climate does not seem to be adapted to the product. It is otherwise in Cali-fornia. At Watsonville astonishing esults have been obtained in sugar beet growing and the farmers around there are rapidly growing rich. We should leave no stone unturned to se cure a fair trial for this very important industry in Southern California.

A PECULIAR CASE.

Mr. Kuhns Tries to Jump an Im-

The People vs. G. S. Kuhns, charged with staying in unlawful adverse pos-session of lands in the San Fernando Valley, came up for trial before Justice Austin and a jury yesterday.

The facts in the case are singular in The facts in the case are singular in the extreme. In March last Mr. Joseph Moffatt, a capitalist of Los Angeles, holding extensive apiary in-terests in Santa Clara and San Fer-Angeles, holding extensive aplary interests in Santa Clara and San Fernando valleys, and who is president of the Phænix Lime Company of Tebachepi, sold to Jacob Lower a house and lot on Banning street, receiving in exchange 80 acres of improved land in the San Fernando Valley, which had been in Mr. Lower's possession for 8 years. The land was unsurveyed Government land, and on it in addition to the growing crops of barley, and a few fruit trees for family use, were a barn and stable, chicken house, store room, and a four-roomed dwelling house. There were also four horses, a cow and about 100 chickens. Mr. Moffatt was at that time proprietor of the shoe store at 262 South Spring street, managed by H. C. Blaney, and he offered Mr. Lower his option of taking either the store or the house and lot in Banning, street in exchange for the San Fernando ranch. Mr. Lower preferred the Banning-street property, and in the bill of sale, the consideration was placed at \$7000.

The defendant, Kuhns, was employed by Mr. Moffatt to take care of his newly-acquired ranch, and was placed in full charge. Everything went well until the end of August, when Mr. Moffatt sent out a man named Charlton to work on his property. On the latter's arrival he was met by Kuhns, who impromed him that be could stay one night, and one night only, as the ranch, being unsurveyed Government land and in his possession, belonged to him, and he proposed to defend his tille to it against all comers, not excepting the President of the United States. Chariton returned the following morning and informed his employer of the stand taken by Kuhns.

Moffatt immediately swore out a warrant against Kuhns, and the latter was arrested. The case first came up before Justics Lockwood, but the defendant applied for a charge of vanue, which as placed at \$7000.

The ovidence showed pisinly that the accused stood, as he himself had frequently admitted, in the position of an employe to Mr. Montatt, but his attorneys claimed that nothing criminal could be found in his actions, since the ranch, though called unsurveyed Government land, had really been surveyed by the United States engineers.

The Judge charged the jury at 4:30 p.m., and they retired to consider their verdict at 5 o'clock.

The jury was out till 8:30 p.m., but was unable to agree, and was discharged without a verdict.

A Burglar and a Receiver of Stolen

Property.
Thomas Knowles, alias Harry Conkling, was brought before Judge Stanton yesterday, charged with committing burglary at the residence of J. C. Gallagher, Santa Fé avenue, on the 9th of ptember last. Mr. Gallagher's house was broken into on that day, and a hat and suit of clothes was secured by the thieves. Detectives Auble and Hawhley traced the articles to a pawnshop kept by Mike Silvener, 204 Alameda street, and the articles were identified and recovered.

kept by Mike Silvener, 204 Alameda street, and the articles were identified and recovered.

Knowles is now in the County Jail on a charge of breaking into a car on the Southern Pacific construction train and stealing therefrom property belonging to the workmen. The evidence connecting Knowles with the burglary at Santa Fé avenue was very clear, and he was held to answer the charge in the Superior Court in the sum of \$500. The defendant is a hard character, and admits to having served a term in the Texas Penitentiary.

In connection with the above, Mike Silvener, the proprietor of the pawnshop in which the goods were found, was arraigned before Judge Owens, charged with receiving goods, knowing the same to have been stolen. The police have had their attention called to Silvener's mode of doing business for some time past, and he has been under suspicion as a very able fence. His examination was set for Monday next, the 31st inst., his bail being fixed at \$500.

JEALOUS EUROPE.

SHE FEARS FOR HER SOUTH AMERICAN TRADE

The Coming International Congress at Washington Looked Upon With Disfavor in the Old World.

By Telegraph to The Times.

NEW YORK, Sept. 24.—[By the Associated Press.] A special from Washington says the State Department is receiving just now from our representatives in Europe a great many interesting extracts from European journals, expressing alarm over the effect upon European trade of the coming conference of American nations. Some of them are almost hysterical in their appeals to the South American republics to distrust our advices and continue to trade in Europe.

Le Temps, of Paris, has been publishing a series of articles expressing the gravest fears as to the consequences of the congress. The paper urges English and French merchants to make every effort to induce the Hispano-Americans to athere to their ancient systems. La Epocu, of Madrid, has also been publishing vigorous comments on the congress. One of the latest communications received at the State Department is from Minister Grant, dated August 8, 1989. It is a long article from the Vienna Prondenblatt, the organ of the Minister of Foreign Affairs of Austra-Enugary. It says:

"The United States Government has invited all the governments of the new world to take part in a congress to be held in Washington, under the watchword of United Americs, and especially America.

EXTENSION CABLES.

Two of Them Drawn Into Place Yesterday.

The cable railway company had some of the big teams of the California Truck Company employed yesterday afternoon drawing into place the cables on the Boyle Heights and Dow-

cables on the Boyle Heights and Downey-avenue extensions.

The Boyle Heights rope, which was first stretched, runs from the power-house on First street to Evergreen Cemetery, the extension being 3200 feet long. As the track is double the rope is of course twice that length. The cars on this branch will be in operation the last of this week.

The Downey-avenue extension is from the Downey-avenue power-house to Pritchard street, a distance of 3600 feet, and is also double track. This extension will not be placed in operation until the Main-street line to East Los Angeles is completed, which will be about a month hence.

I live three-fourths of a mile from the center of the city. I slept with my window up, but did not hear the alarm. On the morning after the fire I learned that only fifteen taps of the bell had been made, and these by an inexperienced party. I did not make any personal investigation as to whether there were any bodies in the building. Did not get there until the next morning. The members could not have saved the lives, but high have saved them from becoming so charted. Did not call a meeting, but there is one this evening. Four minutes did not elapse before the engine was on the road. The tap would not give the information where the dire was informed on the way the fire was a farvanta. The engine there was no connection there, turned back. The law compels the department to go to the city limits. They should not have turned back, although there was no one there to give them orders. They should, however, have yone on. I have nothing to state as ar as I am personally concerned. I hink there was no water connections, the interned and known, would have saved those children. The department should not be censured in turning back, for if there was no water connections, the interned that the alarm been wan if the engine was in the engine for the engine was in the engine of the engine was rather faint. SANTA MONICA.

Sisters' Institute.

SANTA MONICA, Sept. 24.—[Correspondence of The Times.] A detailed account of the arrangements that have been completed for the establishment of the Sisters' Institute was last night secured by your correspondent. To Mr. J. F. Hogan the credit of the whole thing is due. About three onths ago he broached the idea of ob taining a land grant here and on it taining a land grant here and on it placing a large Catholic college, and when the matter came to the ears of Messrs. Jones and Baker they, or at least Mr. Baker, stated that they would donate 10 acres of land for the would donate 10 acres of land for the purpose. A communication was accordingly sent to St. Louis to the Mother-General of the order of the Sisters of St. Joseph, one of the greatest letinale educational organizations in the world, and she at once expressed her walkingness to accept the proposals and to erect a large college.

But when formal application was made for the land the 10 acres was refused, so Mr. Hogan, who was managing the affair, was obliged to look elsewhere. He soon had an offer from Henry Crippin, proprietor of a large

A trip was taken to the site, and the visitors expressed themselves as delighted beyond measure at the location that had been secured. Instructions were given to commence work at once, and ground will be broken on Thursday, Mr. Hogan was appointed superintendent of the work, and Mr. Hall architect, so the last-named gentleman moved down from town with his family yeaterday, and took rooms in the bank building will for the present keep aughtsmen employed on the

stories high, and will be constructed of pressed brick and grante. It will be square with a large court in the center, in which will be placed a lake of artificial water. It is intended to make the institute one not only of learning, but it will be the cradle-seat of the order in the United States, and the Mother General will move to it from St. Louis when it is completed. It will accommodate 1500 pupils and 400 nuns and novices, and in addition to these a seminary is to be constructed on two acres of the land by Bishop Mora, and this will be occupied by noviciary priests.

"I see by the pupers that we are going to expend from \$300,000 to \$500,000 on the building and grounds," remarked the Mother Superioress on Saturday, "but we do not expect to spend less than we did for the St. Louis Institute, and that cost us \$1,300,000."

less Activity and Untiring En-Store is Doing.

Ios Angeles, Sept. 25, 1880.

The writer does the most who gives to the reader the most knowledge and takes from him the least time, for in these days of busy time, when time is money, everything whiris in constant activity, and in this activity, made so by means of application and strict attention to the minutest duties. In times I ke the present, there is no a anding still. It is either a forward, caward movement or a sad retrograde—ne half-way mea-ures—and to that end any merchant who cannot see ahead—who only looks to the end of his nose—is firetrievably lost.

It may seem strauge if we were to tell you that all day long the writer has been sending orders for thristmas wares, for holday merchandise, for Santa Claus goods of all sorts, and yet it is a quarter of a year to the allotted time. So, readers, it behoves you also to take advan age of our bargains even before you need them. For instance, tomorrow we are going to sell 10 spools of James Chadwick's best six-cord spool thread for 25c. We think nothing of purchasing months ahead a supply the we require and when we find bargains quantity is no object.

It is far better to take time by the forelock—gain as much as you can by ourcumstances, and make the saving in dollars and cents. To se use, we have strange ideas about certain things, and in our con-ervatism look at matters, probably, different from most merchants. That we astenish some, we will admit; that we horrorize many, we de believe: but that we benefit all is a fact that we are certain of. We accomplish most by giving to our readers knowledge, and take from them the very least time.

CATARRH.

Catarrh is often regarded by the patient as a cold in the head, and he often expresses hi astenishment at his remarkable tendency to outract a fresh cold. Indeed he declares he a scarcely free from one cold before he takes nother; and he is siways exceeding, or carryul. It is also a matter of surprise to him that he cold always seems to settle in the head ad the throat.

the cold always seems to settle in the head and the throat of the symptoms of catarrh may seem to abote, and the patients led to hope that the disease is about to wear of; but another class of symptoms soon appear, and he learns to his horror that instead of recovery from the disease it is somewhat changed in its character, and has extended to the throat. A sense of weariness is sometimes felt in the throat, or it appears as sometimes felt in the throat, or it appears as mess at times occurs, a sem-ation of dryness is sometimes felt in the throat, or it appears, and, to suffer the disease upon a little exertion, a short, had, and the throat, there becomes a sense of languor and fatigue, the breathing court, a peculiar sound in clearing the throat, a feeling as though there was not room enough in the chest to breathe; these has made considerable progress. Then it is a time when consumption is about to begin its dreadful work. Up to this point the progress of the classe may have been also, and the had the oatarrh for years and has not seemed to become much worst, and trusts he will "by and by" recover. But this delusion is the grand error which has peopled our cemeteries with consumptive form, as all forms of eatarrh end finally in consumption.

and by recover. But this delusion is the stand error which has peopled our cemeteries with consumptive forms, as all forms of catarrh end finally in consumption.

The great danger, however, because the most common, is that it will extend downward and affect the lung x. In most cases of pulmonary disease catarrh is present to some decree, and in many in stances it causes a feed of the stance of the stance
